National Citizen Survey Results

CITY OF

MONROE

Raisin' Expectations

Report to City Council
October 1, 2018

Why?

CITY COUNCIL GOAL E:

Promote Community Engagement Programs

CITY COUNCIL GOAL F:
**Provide Fiscal Responsibility While Maintaining Quality of Life**

Objective 4: Enhance Service Delivery Through Customer Experience Improvements

Why NCS™?

- Skilled research scientists

- Over 20 years Experience Survey Research

- Completed surveys in over 500 communities nationwide

- Public Sector: Local governments (ICMA Endorsed), non-profits, Foundations and more

Survey Administration

- Mailed to 2,500 random households—by precinct
3 notifications, 1 week apart

- 13 "grid" questions containing 132 items from proven question bank

- 4 custom questions were added:
    1. Strategic planning focus
    2. Operations priorities
    3. Customer service experience with City Departments
    4. Preference for communication source from the City

- Opt-in web survey included—posted in social media

Overall Survey Response Rates

- 3% of the 2,500 surveys were returned by the Post Office

- Of the remaining 2,417 HHs, 576 completed the survey for a **overall response rate of 24%**

- Of the 576 completed surveys, 57 were completed online

- Additional 486 residents completed the online opt-in survey

Grand Total of 1,063 completed surveys.

Mailed Survey Response by Precinct

	Precinct 1	Precinct 2	Precinct 3 North	Precinct 3 South	Precinct 4	Precinct 5	Precinct 6	Overall
Total Sample Used	365	302	225	151	481	484	493	2,500
Complete Interviews	71	59	31	17	146	134	109	567
Response Rate	20%	20%	15%	14%	32%	29%	23%	**24%**

Combine these two when considering outcomes.

Survey Validity has 2 considerations:

1. How confident is the community in the results from those who completed the survey vs. had the survey been administered to the entire population?

2. How closely do the perspectives recorded on the survey reflect what resident really believe or do?

Ensuring Survey Validity

- <u>Using a mail-out/mail-back methodology</u>, which typically gets a higher response rate than phone for the same dollars spent. A higher response rate lessens the worry that those who did not respond are different than those who did respond.

- <u>Selecting households at random</u> within the community to receive the survey to ensure that the households selected to receive the survey are representative of the larger community.

- <u>Over-sampling multi-family housing units</u> to improve response from hard-to-reach, lower income or younger apartment dwellers.

- <u>Selecting the respondent within the household</u> using an unbiased sampling procedure; in this case, the "birthday method." The cover letter included an instruction requesting that the respondent in the household be the adult (18 years old or older) who most recently had a birthday, irrespective of year of birth.

- Contacting potential respondents three times to encourage response from people who may have different opinions or habits than those who would respond with only a single prompt.

- Inviting response in a compelling manner (using appropriate letterhead/logos and a signature of a visible leader) to appeal to recipients' sense of civic responsibility.

- Providing a pre-addressed, postage-paid return envelope.

- Weighting the results to reflect the demographics of the population.

What did the survey measure?

Conclusions –
Economy is Top Priority!

CITY OF MONROE *Michigan*

92% of residents say economic health is essential or very important priority over next 2 years!

8 in 10 Monroe residents are not under housing stress – higher than national benchmark.

Top Priorities Over the Next 2 Years:
- 92% – Economic Health
- 90% – Safety
- 89% – Street Surface Improvements
- 82% – Downtown Redevelopment

Conclusions – Improving Quality of Life

Important factors to improve Quality of Life:
Recreation on the River
& Farmers Market

Monroe residents were more likely than comparison communities to engage in active transportation.

Just 13% gave positive marks for shopping opportunities – **"much lower" than peer average.**

City parks receive high marks by 2/3 of residents – **similar to benchmarks.**

Conclusions –
Residents Feel Safe, *but...*

86% of residents feel safe in their neighborhoods.

87% feel safe downtown during the day vs. 60% at night.

Residents are more likely to contact Police or Fire than any other department.

Only half give positive ratings to overall feeling of safety.

90% of residents feel safety is the number two priority of the City in the next 2 years.
